New Fund Choice

In an effort to give you the best available options of mutual funds, we have added a new American Fund to the plan. The American Funds have created a great reputation of offering quality performance with extremely low management fees.

In addition to your current funds, we are now offering the following fund:

➤ SMALLCAP World

The NASDAQ market has made tremendous moves this past year due to the rise in technical stocks, especially internet stock. This new fund offers these types of investments. We do not recommend that you put all of your funds into this higher risk investment. As always, we recommend that you model your portfolio using a combination of at least four funds, diversifying your risk.

You can modify your account by completing a new Election Form enclosed, or log onto to the internet.

We hope you are pleased with the addition of these new funds. We look forward to continuing to offer enhanced plan options.
